UPSALE — Project Progress & Next 2-Day Schedule

Simple report based on BRD Phases 1–4 and the current codebase. Easy list of what is working and what is still left.

Date: 29 September 2026 | **Team:** Muhammad Haris · Savaiz Said Gill | **Window:** next 2 days

1. Overall Progress

Phase	Simple name	Progress	In one line
Phase 1	QR + customer capture	**98%**	Almost finished — ready for demo
Phase 2	History, segments, deals	**55%**	Half done — WhatsApp send still missing
Phase 3	AI Deal Maker	**2%**	Not built yet (landing text only)
Phase 4	Landing + subscriptions	**45%**	Landing done — paid plans not live
Overall	All BRD phases (equal average)	**50%**	(98 + 55 + 2 + 45) ÷ 4

Project is 50% complete. Phase 1 works end-to-end. Next big gaps: real WhatsApp messages, AI Deal Maker, and real subscription plans.

2. Features Done vs Pending (by Phase)

Green = working in the app. Orange = still to build. Percentages come from how much of each BRD phase is covered.

Phase 1 — QR Discount & Capture — 98%

DONE
✓ Business signup / login / OTP / profile
✓ Create offer + QR code + public link (/o/slug)
✓ Customer claim form (name, WhatsApp, optional email + consent)
✓ Unique coupon saved; customers & coupons in dashboard
✓ Mark coupon redeemed (one-use); customer CSV download
✓ Overview dashboard stats

PENDING
■ Small polish only (edge cases / copy) — not blocking demo

Phase 2 — History, Segments & WhatsApp Deals — 55%

DONE
✓ Record visit / purchase on customer detail
✓ Visit history list (amount + note)
✓ Segments: New / Repeat / VIP / At Risk (filters + deal audience)
✓ Deals page: create message, pick audience, send now or schedule
✓ Deal status list (scheduled / sent) + skip opted-out customers in audience
✓ optedOut field on customer model

PENDING
■ Real WhatsApp API send (today only marks “sent” in database)
■ Owner / customer opt-out toggle + STOP handling UI
■ Campaign delivery log (per message sent / failed)
■ Spam / frequency limits for same customer

Phase 3 — AI Deal Maker — 2%

DONE
✓ Mentioned on landing page only

PENDING
■ AI suggests deal + WhatsApp text from visit / spend history
■ Owner actions: Approve / Edit / Regenerate / Schedule
■ Never auto-send without owner approval
■ Respect max discount / min spend rules

Phase 4 — Landing & Subscriptions — 45%
DONE ✓ Public landing page (journey, guide, demo, pricing UI) ✓ Starter / Growth / Pro shown; Growth marked popular ✓ Profile shows trial / plan badge text
PENDING ■ Real plan selection + country-based pricing in account ■ Checkout / billing (Starter, Growth, Pro limits) ■ Usage limits enforced by plan

3. Pending Tasks (simple + Roman Urdu)

Har pending task ke neeche 2–3 lines Roman Urdu mein short explanation hai taake team easily samajh sake.

#	Task	Phase	Pri	Explanation (Roman Urdu)
1	**WhatsApp real send**	2	**P0**	Abhi deal create hone par system sirf database mein “sent” likh deta hai. Asal WhatsApp message customer tak nahi jata. WhatsApp Cloud API ya n8n connect karke Send now / test message chalana hai.
2	**Opt-out / STOP control**	2	**P1**	Customer pe optedOut field hai, lekin owner ke paas clear on/off button nahi. STOP ya unsubscribe flow bhi incomplete hai. Iske baghair marketing block poori tarah safe nahi.
3	**Campaign send log**	2	**P1**	Deal list mein status hai, lekin har customer ko message gaya ya fail hua — yeh detail nahi dikhti. Simple log se demo aur debugging dono asaan ho jayenge.
4	**AI Deal Maker**	3	**P0**	AI abhi deal suggest nahi karti. History se title + WhatsApp text banani hai. Owner Approve / Edit / Regenerate kare — auto-send bilkul nahi. Phir deal Deals page par schedule ho sakti hai.
5	**Super Admin panel**	Admin	**P0**	Platform admin login + businesses list chahiye. Admin kisi business ko activate ya suspend kar sake. BRD phase number nahi, lekin demo / ops ke liye zaroori hai.
6	**Subscription plans live**	4	**P1**	Landing par plans dikhte hain, lekin account mein real choose / pay nahi. Country pricing + Starter/Growth/Pro limits lagani hain. Poora payment gateway time short ho to badge + limits pehle theek hain.
7	**Demo harden + README**	All	**P0**	Poora flow ek dafa test: signup → QR → claim → redeem → visit → deal. Bugs fix karke README mein env / Atlas / demo steps likh do. Is se presentation smooth aur repeatable ho jati hai.

4. Schedule for Next 2 Days (equal tasks)

Har person ko har din **3 tasks** milte hain (total 6 + 6). Subah / shaam split nahi — din ka list ek block mein complete karna hai.

Day 1

Muhammad Haris (3)	Savaiz Said Gill (3)
1. **WhatsApp send path** — Cloud API ya clear stub + “Send test” from Deals	1. **AI Deal Maker v1** — suggest title + WhatsApp copy from segment stats
2. **Opt-out toggle** — owner customer detail se opted-out on/off; deals exclude check	2. **Approve / Edit / Regenerate** — no auto-send; push into Deals form
3. **Campaign log** — simple sent / failed count or notes on a deal	3. **Super Admin scaffold** — admin login + list all businesses

Day 2

Muhammad Haris (3)	Savaiz Said Gill (3)
1. **Schedule runner stub** — due scheduled deals mark as sent at run time	1. **Super Admin actions** — activate / suspend business + status badge
2. **E2E demo pass** — signup → QR → claim → redeem → visit → deal	2. **Plans on Profile** — show Starter / Growth / Pro + trial badge
3. **README checklist** — Atlas, env, claim URL, redeem, Deals steps	3. **AI polish** — empty states + wire suggestion into create-deal form

5. Fair Split

Member	Day 1	Day 2	Total	Focus
Muhammad Haris	3	3	**6**	WhatsApp, opt-out, logs, demo quality
Savaiz Said Gill	3	3	**6**	AI Deal Maker, Super Admin, plans UI

6. Done When (end of Day 2)

- ■ Phase 1: scan → consent → coupon → redeem once; CSV works
- ■ Phase 2: visit logged, segment used, deal can send/test to consented customers only
- ■ Phase 3: AI suggestion shown; owner must approve before send
- ■ Admin can list/suspend a business; Profile shows plan names
